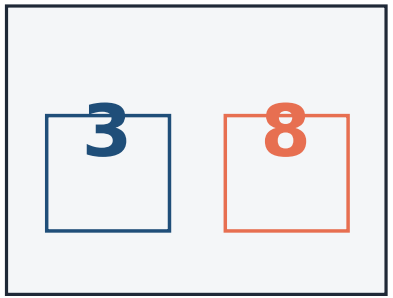
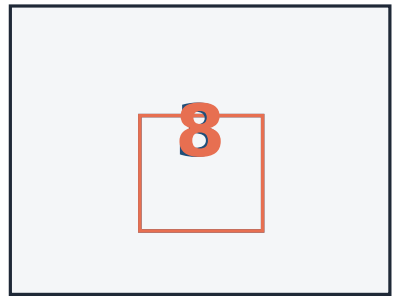
Persistent-object scoring uses one-to-one assignment and fixed ground-truth denominators

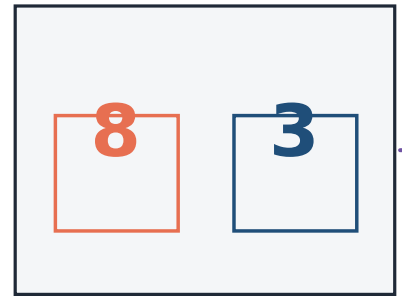
generator IDs and boxes



before crossing



crossing



after crossing

illustrative Hungarian cost

	pred A	pred B
GT 3	0.14	0.79
GT 8	0.74	0.20

accepted links
GT 3 -> pred A
GT 8 -> pred B

miss mini-case
one visible GT
has no accepted link

extra mini-case
one predicted component
has no GT link

coverage
M / n_GT

identity
correct /
n_GT,labelled

Misses stay in trajectory and identity denominators; horizontal order is never used as object identity.
