Privileged pose-indexed raw memory: explicit coverage and neural-reference effects
A Explicit coverage
Median stored world columns
Mean future-crop observed fraction
Stored warm-up frames K
B Registered simultaneous family
raw K14 → K48
raw K38 → K48
hier-min → raw K48
hier-long → raw K48
strided-flat → raw K48
flat-c2 → raw K48
RAW ACCESS CEILING CI CLEAN
K38 saturation: no
raw span diagnostics
neural → raw K48
Baseline error − raw-K48 error
Raw pixels and exact poses are supplied; this reference is not token matched.
